K-State to offer animal sciences leadership academy this summer

Annual event draws high school students from across the country

K-State Research and Extension news

MANHATTAN, Kan. – Kansas State University is now taking applications for a four-day leadership academy for high school students that have an interest in the livestock industry and related careers.

The Kansas State University Animal Sciences Leadership Academy is an intensive fourday educational experience designed to enhance the leadership skills and animal science knowledge of students in grades 9-12.

This is the 15th year of the academy, hosted by <u>K-State's Department of Animal</u> <u>Sciences and Industry</u> in Manhattan and set for June 5-8. Applications are due April 15, and can be found at <u>asi.ksu.edu/KASLA</u>.

Mike Day, head of K-State's Department of Animal Sciences and Industry, said the academy's goal is to develop young leaders within the livestock industry and prepare them for a successful future in the field.

"Each year, (K-State's animal sciences department) looks forward to hosting the selected group of youth for the KASLA program," Day said. "This program is a great opportunity for future agriculture leaders to visit campus to get an inside look at the opportunities our department and the agriculture industry provides. This program helps build the future of the livestock industry and we appreciate all the industry stakeholders and companies that contribute to the program to make it a success."

The academy is sponsored by the Livestock and Meat Industry Council, Inc.

The program's itinerary features interactive workshops, tours and faculty mentor time with animal science professors. Industry leaders will also join the participants frequently to share their knowledge and expertise.

Throughout the week, participants will work in teams to evaluate current events within the animal science industry and educate others. This experience will culminate with team presentations and a closing reception on the final morning.

Organizers say only 20 students will be accepted for the 2024 session to ensure individualized attention from counselors, professors, and industry leaders. Participants will stay on campus in university housing with program staff for the duration of the event.

Transportation to and from the event is the responsibility of the participant, along with a \$50 fee to reserve his or her space. The fee is only due upon acceptance and not at the time of application. LMIC generously provides all other sponsorships.

For more information, contact academy director Sharon Breiner at <u>sbreiner@ksu.edu</u> or 785-532-6533.

Livestock and Meat Industry Council, Inc., https://ksulmic.org

The Kansas State University Department of Animal Sciences and Industry serves students, livestock producers and the animal and food industries through teaching, research and education. The K-State ASI department prepares students for careers in the animal and food industries. The curriculum includes the study of nutrition, reproduction, genetics, behavior, meat science and food science with production, management, and agribusiness skills. For more about K-State's ASI department visit asi.ksu.edu.

The Livestock and Meat Industry Council is dedicated to facilitating interdisciplinary research that identifies and addresses issues/opportunities facing animal agriculture and the efficient production of food. The Council solicits volunteer contributions including money, land, livestock, equipment and other bequests in support of approved priorities and initiatives within the Department of Animal Sciences and Industry, in cooperation with the College of Agriculture at K-State.

K-State Research and Extension is a short name for the Kansas State University Agricultural Experiment Station and Cooperative Extension Service, a program designed to generate and distribute useful knowledge for the well-being of Kansans. Supported by county, state, federal and private funds, the program has county extension offices, experiment fields, area extension offices and regional research centers statewide. Its headquarters is on the K-State campus in Manhattan. For more information, visit <u>www.ksre.ksu.edu</u>. K-State Research and Extension is an equal opportunity provider and employer.
