Video: Do-it-Yourself centerpiece for fall celebrations

[In this video from K-State Research and Extension](#), floral design instructor Irina Sheshukova walks viewers through the process of making your own centerpiece using fall flowers and foliage.

“Fall is such a beautiful time of year,” Sheshukova said. “If you go outside, you can always find inspiration from colors, flowers and foliage... that you can use for your designs.”

This 20-minute tutorial walks viewers through the basics, from establishing a floral foam, building the base with greenery and – of course – adding delightful colors throughout.

K-State Research and Extension video produced by Dan Donnert.

K-State Research and Extension is a short name for the Kansas State University Agricultural Experiment Station and Cooperative Extension Service, a program designed to generate and distribute useful knowledge for the wellbeing of Kansans. Supported by county, state, federal and private funds, the program has county extension offices, experiment fields, area extension offices and regional research centers statewide. Its headquarters is on the KState campus in Manhattan. For more information, visit www.ksre.ksu.edu. K-State Research and Extension is an equal opportunity provider and employer.
